

Strength, Fascia & Healthy Ageing Workshop Proposal

Prepared for clubs, institutions, schools, business groups, community associations, and wellness-focused organizations seeking a practical, expert-led session on fitness, pain awareness, fascia health, and healthy ageing. [file:1][file:2]

Workshop positioning

This proposal presents a premium wellness workshop format that is broader than a corporate-only session, so it can be offered to club members, professionals, business owners, educators, families, and leadership communities. [file:1][file:2]

Recommended title: Strength, Fascia & Healthy Ageing Workshop

Alternate titles: Preventive Wellness Workshop; Strength, Mobility & Fascia Wellness Workshop; 40+ Fitness, Pain Relief & Fascia Workshop. [file:1][file:2]

Workshop overview

This is a 90-minute expert-led session combining practical strength and fitness education with musculoskeletal pain awareness and live fascia-related demonstration. [file:1][file:2]

The session is designed especially for adults above 40, while remaining relevant for any participant who wants better mobility, posture, strength, energy, and a more confident understanding of pain management and daily wellness habits. [file:1][file:2]

Format

- 90-minute presentation and interaction. [file:1][file:2]
- Delivered by 2 experts: Simran Agarwal and Dr Anuraag Jaiswal. [file:1][file:2]
- Includes live fascia manipulation or pain/posture demonstration on 1-2 selected volunteers where appropriate. [file:1][file:2]
- Focuses on practical, real-life guidance rather than extreme fitness messaging. [file:1][file:2]

Workshop aim

Help participants understand why they may feel stiff, tired, weak, or in pain, and what practical steps they can take next. [file:1][file:2]

The session combines Simran Agarwal's strength training, fitness, and nutrition guidance with Dr Anuraag Jaiswal's musculoskeletal and fascia-based clinical perspective, creating an accessible and actionable wellness experience. [file:1][file:2]

Core topics

- What fascia is, and why connective tissue matters for movement, flexibility, strength, and everyday comfort. [file:1][file:2]
- Pain and posture: how long sitting, overload, dehydration, and poor movement habits can contribute to discomfort. [file:1][file:2]
- Strength after 40: why resistance training supports muscle, bone health, stamina, hormones, confidence, and healthy ageing. [file:1][file:2]
- Fitness beyond weight loss: using movement to improve mobility, disease prevention, performance, and independence. [file:1][file:2]
- Breaking myths around strength training for adults above 40. [file:1][file:2]
- Daily nutrition habits that support energy, recovery, muscle maintenance, and long-term health. [file:1][file:2]

Participant outcomes

Participants leave with a clearer understanding of pain, stiffness, fascia, posture, strength training, and the small but important daily habits that influence long-term wellness. [file:1][file:2]

Hosts receive an expert-led session suitable for mixed audiences, including clubs, schools, institutions, associations, leadership groups, and business communities. [file:1][file:2]

Selected participants may also experience a live demonstration of fascia manipulation or posture-related assessment during the session, helping the audience understand the method in a practical way. [file:1][file:2]

Expert profiles

Simran Agarwal

Fitness Coach | Strength Training | Founder, EatLiftMove. [file:1][file:2]

Relevant strengths reflected in the current draft include fitness coaching, strength training, practical wellness education, and 40+ fitness guidance. [file:1][file:2]

Dr Anuraag Jaiswal (PT)

Consultant Musculoskeletal Physical Therapist | Founder, Swasthya Clinic. [file:1][file:2]

The current draft positions Dr Anuraag around musculoskeletal therapy, fascia-related care, and pain relief with a practical clinical approach suitable for live workshop education. [file:1][file:2]

Camp proposal

A workshop can be extended into a 1-day or 2-day wellness camp when there is strong participant interest, especially for groups of around 30-40 people. [file:1][file:2]

1-day camp

- Participant screening for pain, stiffness, movement limitation, and common postural concerns. [file:1][file:2]
- Selective fascia manipulation support for people experiencing localized pain or restriction. [file:1][file:2]
- Guided movement, mobility, and practical exercise coaching. [file:1][file:2]
- Basic strength and healthy ageing routines participants can continue afterward. [file:1][file:2]

2-day camp

- Greater scope for individual fascia-related intervention and participant handling. [file:1][file:2]
- More structured live workout sessions and corrective movement work. [file:1][file:2]
- Deeper guidance on pain awareness, recovery, exercise progression, and sustainable lifestyle habits. [file:1][file:2]
- Better suitability for larger or more engaged audiences who want practical take-home support. [file:1][file:2]

Camp audience

This format can be proposed to clubs, schools, institutions, residential communities, private groups, business forums, and wellness-oriented organizations. [file:1][file:2]

Suggested language replacements

Use these replacements throughout the final design to broaden the audience positioning. [file:1][file:2]

Current wording	Better wording
Combined Corporate Workshop Proposal [file:1][file:2]	Combined Wellness Workshop Proposal [file:1][file:2]
Corporate Strength & Fascia Wellness Workshop [file:1][file:2]	Strength, Fascia & Healthy Ageing Workshop [file:1][file:2]
employees [file:1][file:2]	participants / attendees / members [file:1][file:2]
desk-heavy teams [file:1][file:2]	professionals and individuals with sedentary routines [file:1][file:2]
corporate outcomes [file:1][file:2]	participant outcomes / workshop outcomes [file:1][file:2]
corporate audiences [file:1][file:2]	mixed audiences / member communities / host audiences [file:1][file:2]

Current wording	Better wording
corporate wellness [file:1][file:2]	preventive wellness / lifestyle wellness / community wellness [file:1][file:2]

Credibility and past engagements

A credibility section should mention that similar wellness sessions or invited engagements have already been conducted with Harley-Davidson, Rotary Club, and Terapanth. [file:1][file:2]

Suggested line: Previous sessions and invited engagements include Harley-Davidson, Rotary Club, and Terapanth, reflecting cross-community interest in practical fitness, pain relief, fascia care, and healthy ageing. [file:1][file:2]

The current draft already references a Rotary Club credibility snapshot, which supports adding a broader credibility block in the revised proposal. [file:1]

Suggested final page blocks

For a clean 2-page PDF, use this structure: [file:1][file:2]

1. Cover page: title, subtitle, expert photos, 4 highlight boxes, workshop aim, expert profiles. [file:1][file:2]
2. Second page: core topics, participant outcomes, camp proposal, past engagements, and contact details. [file:1][file:2]

Cover-page subtitle

Use this subtitle under the main heading:

A practical, high-impact wellness workshop for professionals, club members, educators, business owners, and adults seeking better strength, mobility, pain awareness, posture, and healthy ageing support. [file:1][file:2]

Highlight boxes

Use these four boxes near the top of the page: [file:1][file:2]

- 90-minute expert-led session. [file:1][file:2]
- 2 specialists: fitness coaching + musculoskeletal pain care. [file:1][file:2]
- Live fascia demonstration on selected volunteers. [file:1][file:2]
- Practical, beginner-friendly, no extreme fitness talk. [file:1][file:2]
